## Objective

---

Detail-oriented and analytical professional seeking the position of Data Analyst and administrator equipped with strong analytical skills, proficiency in data manipulation, and a commitment to delivering valuable insights. Purposeful work to achieve flawless results.

## Experience

---

**TELUS International AI Data Solutions | Online Data Analyst | Remote**

**Feb 2024 – Present**

- Optimization, analysis of work processes, and problem-solving.
- Research online using search engines, online maps, and website information.
- Being open to working across a diverse set of Task Types
- Project aimed at improving the content and quality of digital maps, which used by millions of users globally.
- detail-oriented, likes doing research and has a good knowledge of national and local geography.

**Elfa I Database Developer | Remote**

**2022-2023**

- Developed and optimized databases using SQL, PL/SQL, and other query languages.
- Scraping and data transformation, API (JSON); ETL and manipulation of large data sets.
- Created/Stored procedures, functions, and triggers to automate data operations.
- Performance of correct and thorough analysis of data, presenting results using Excel, PowerPoint, and Microsoft BI.
- Worked on optimizing database performance, including indexing, query execution analysis, and table structure optimization, Python (Programming Language) · Dashboard Creation
- Organized cooperation with the development team to integrate databases into applications.
- Manipulation with Data, data modelling and data interpretation. Advanced level in Excel including pivot tables, Power Query, and PowerPoint to create service documentation and presentations for database users.

**Flores Pendulares I Analytics Manager (On-site)**

**2020-2022**

Optimization, analysis of work processes, and problem-solving were pivotal elements of my role. Throughout my tenure, I adeptly developed related databases SQL and Database Management.

Supervised the extraction transformation loading (ETL) and (ELT) stages for seamless data integration and played a key role in real-time database updates and report generation through the development of SSIS and SSRS, and key performance indicators (KPIs).

Discovering relationships and trends that explain these anomalies, synchronize databases in a cloud network integration between managers and stakeholders, and implement control, and decision support with data quality assurance, all workflow processes - remotely.

This yielded several advantages for the company:

- Build RDBMS reports, supporting executive dashboards, ongoing operations analysis, management choices, and providing quality improvements.
- Automate report distribution through standard and data-driven subscriptions.
- Conducting research and forecasting potential issues, promptly acting for resolution.
- Developing comprehensive plans.
- Exerting control and enabling real-time mobility in the working process.

### **Schroll Flowers I Co-op Clerk | System Administrator**

Teamwork and individual work with minimal instruction. Creating and implementing innovative ideas.

Delivered new search experiences on Microsoft Platform, and GCP Google Cloud Platform.

-Excel proficiency, including pivot tables and data modelling

-Created and maintained dashboards for monitoring key performance indicators (KPI)

Demonstrated strong ability to work and communicate in a foreign environment.

Responsible:

- Data collection, cleaning, and validation processes.
- Time Registration and weekly reporting, experience with Microsoft Word, Excel, and PowerPoint.
- Controlling production QA.
- Installation, configuration, troubleshooting, maintenance and testing of software packages.
- Strong IT troubleshooting - Hardware/Software and Networking.

Elevated level of Teamwork, solving problems and with minimal instruction.

## **Skills & abilities**

---

- Strong working knowledge of Microsoft SQL Tools: SSIS, SSRS, SSAS, SSMS.
- Proficient in Data Visualization Tools (PowerPoint, Tableau, Power BI, Looker Studio)
- Statistical analysis and Big Data Analytics
- Database querying and SQL; Data Reporting; Extract, Transform, Load (ETL)
- Microsoft Office Suite: Word, Access, and Excel proficiency, including pivot tables, data modelling, extracting and web scraping.
- Website development (Back-end and Front-end), excellent knowledge of JavaScript, PHP, PhpMyAdmin, Node.js etc.
- Knowledge of Virtualization technologies under Windows, Linux, Unix, OS.
- System Administration, cybersecurity of databases: installation, configuration, troubleshooting, protection, and maintenance.
- Strong IT troubleshooting - Hardware/Software and Networking

## Education

---

**Algonquin College of Applied Arts and Technology**

Mar 2024

Grade: Certificate of High School Diploma

**Mykolaiv National Agrarian University**

Jul 2019

Grade: Bachelor, Manager of Agriculture Operation and Related Sciences

**Petro Mohyla Black Sea National University**

Apr 2015

Grade: Certificate, Management Business Administration

### **LinkedIn Learning and (CPE) Certificates of Completion:**

- Linux: Command Line
- MySQL Installation and Configuration
- SQL Server Integration Services
- Data Analytics for Business Professionals
- Learning Data Analytics: Extending and Applying Core Knowledge
- Microsoft Azure Fundamentals (AZ-900) Cert Prep: 1 Cloud Concepts by Microsoft Press
- Introduction to Career Skills in Data Analytics
- Data Analytics with Google Cloud BigQuery and Looker Studio
- Microsoft SQL Server 2022 Essential Training
- SQL Server: Reporting Services
- SQL Server Database Triggers
- Learning Microsoft SQL Server 2019
- Database Foundations: Intro to Databases
